SEWP VI Program Overview

NASA SEWP (Solutions for Enterprise-Wide Procurement) provides the latest Information Technology, Communications, and Audio Visual (ITC/AV) solutions and services to all Federal agencies and their approved contractors. Established in 1993, SEWP was the first Government-Wide Acquisition Contract (GWAC) in the federal acquisition space.

The program is self-funded through a 0.34% usage fee and supports tens of thousands of orders annually across the Federal Government.

SEWP VI represents the sixth generation of the program and reflects three decades of acquisition innovation, continually expanding scope to meet the evolving technology needs of Federal customers. SEWP VI features a $20 Billion ceiling value per prime contract and a 10-year ordering period.

What's in scope for SEWP VI?

SEWP is designed to provide a broad suite of Information Technology, Communication and Audio Visual (ITC / AV) solutions and services. Technology is ever evolving and for that reason SEWP's processes enable our Contract Holders to add new commercial technology and IT services to their contract daily, as requested by our customers.

SEWP VI Scope Categories

The SEWP VI contracts were awarded by scope category. The three categories are: Category A – ITC/AV Solutions (covering hardware, software, cloud solutions, maintenance, and product-based services, and split into unrestricted and SBSA sub-categories); Category B – Enterprise-Wide ITC/AV Service Solutions (covering enterprise-level IT, communications, and audiovisual infrastructure support services and open to all business sizes); and Category C – Mission-Based ITC/AV Service Solutions (covering IT mission-based services and limited to small businesses).

Fair Opportunity

FAR 16.505(b)(1) provides that each Contract Holder shall be given fair opportunity to be considered for each order exceeding the micro-purchase threshold and issued under multiple-award contracts. The method for obtaining fair opportunity is at the discretion of the ordering agency's Contracting Officer (CO), who must document the rationale for placement and price of each order.

Ordering agencies are encouraged to use the SEWP online Quote Request Tool (QRT), which automatically includes Contract Holders within a selected Group or based on a suggested source, to assist in this process and to support required decision documentation.

Ordering Process

The internal ordering process of each agency varies. The process and accompanying forms for Purchase Requests (PRs) and Delivery Orders (DOs) issued against a SEWP contract are defined by the issuing agency, not by the NASA SEWP Program Management Office (PMO). Typically, an end user determines a requirement and generates a PR.

The PR, along with any necessary funding information, is sent to that agency's procurement office, which results in the issuance of a DO. Any valid Federal agency DO form and associated Delivery Order number may be used. The NASA SEWP PMO does not issue DOs — these must be issued through the ordering agency's own procurement office. The SEWP PMO reviews, processes, and tracks issued DOs, and forwards them to the applicable Contract Holder(s).

Some agencies maintain special requirements for issuing IT Delivery Orders. It is the issuing agency's Contracting Officer's (CO/KO) responsibility to be aware of any agency-specific policies regarding orders placed via SEWP or other Government-Wide Acquisition Contracts. If modifications are made to any order, those modifications must also route through the SEWP PMO.

For SEWP VI program support, including how to obtain a quote for hardware, software, or services, as well as support for installation, basic warranty, extended warranty, technical support, software support, and other post-delivery issues, and to troubleshoot a problematic order, please contact the SiloSmashers Inc SEWP VI Program Office personnel detailed below.
